

# SUPPORT AND REPORTING OPTIONS FOR SURVIVORS OF SEXUAL ASSAULT

You can speak with someone at any time. Reporting is always your choice. Support and resources are available for you, even if you decide not to report to the police. We are here to help.

## EMERGENCY SERVICES

Evidence collection is most effective within the first 72-96 hours of an assault. You can work with a Sexual Assault Response Team for anonymous evidence collection — the evidence will be available if you decide to report at a later date.
